

Analysis Carbon Emissions Employee Commutes

Carbon Emission Statistics

Metric	Value	Unit
Average Emissions per Trip	100.00	kg CO2e
Total Distance Traveled	30.00	km
Average Distance per Trip	30.00	km
Total CO2 Emissions	100.00	kg
Total CH4 Emissions	100.00	kg
Total N2O Emissions	100.00	kg
Total WTT (Well-to-Tank)	100.00	kg CO2e

Emission Breakdown Analysis

<div>By Transportation Type</div> <div>Transportasi 1 100.00 kg</div>
<div>By Fuel Type</div> <div>Pertalite 100.00 kg</div>

Key Findings & Recommendations

- Highest emitting transportation method: **Transportasi 1** (100.00 kg CO₂e)
- Highest emitting fuel type: **Pertalite** (100.00 kg CO₂e)
- Average emissions per business trip: **100.00 kg CO₂e**
- Total distance covered in analyzed period: **30.00 km**
- Average emissions per trip are considered high (> 5 kg CO₂e). Consider route optimization or more efficient transportation alternatives.
